

AGENTIC ARCHITECT

AGENTIC OPERATIONS

Engineering autonomous workflows for
high-stakes services.

PAVEL UGAMOTI

YOUR TEAM IS WASTED ON MANUAL DATA MOVEMENT

Most service firms lose 40% of their labor capacity to "glue work"—manual data entry, lead routing, and file management.

LEADS

Latency Kills Conversion

4-24h response delays mean prospects move on before your team even opens the inquiry.

DOCS

Compounding Errors

Manual keying from PDFs creates silent failures that break downstream systems.

KNOWLEDGE

Knowledge Silos

SOPs buried in Slack threads and emails. Finding answers costs hours of billable time.

PRODUCTION-GRADE ARCHITECTURE

I build client-owned systems that run on your infra. No vendor lock-in. No black boxes.

LOGIC

Orchestration

n8n workflows + custom logic routing for reliable execution.

MODELS

Intelligence

GPT-4o / Claude 3.5 / Local LLMs for decision making.

DATA

Infrastructure

HubSpot, Supabase, Google Drive. Your keys, your storage.

SECURITY

Governance

Secret management + real-time health monitoring.

01 — LEAD QUALIFICATION ENGINE

VALUE PROP

Intake to CRM in <10 Seconds

93% faster response. AI scores inquiries (Hot/Warm/Cold) and routes to Slack/CRM instantly, ensuring your team hits prospects while they're still on your site.

OUTCOMES

- Immediate follow-up
- Zero spam in inbox
- Priority escalation

WIREFRAME: LEAD PIPELINE

02 — DOCUMENT INTELLIGENCE

PDF-TO-DATA: ZERO RETYPING

EFFICIENCY

90% Reduction

Eliminate manual entry. AI Vision extracts structured data from invoices, contracts, and specs with high precision.

QUALITY

Data Validation

Logic-based validation rules catch discrepancies before they hit your ERP or CRM. Full audit trail included.

03 — ONBOARDING AUTOMATION

OVERVIEW

Deal Close to Kickoff on Autopilot

Trigger workflows on contract sign. Folders, tasks, and client next-steps provisioned in <24h.

OUTCOME

Consistent Delivery

Same sequence every time; zero missed steps.

OUTCOME

No Handoff Delay

Instant transition from sales to delivery team.

OUTCOME

Reduced Admin

Eliminate manual setup overhead for every new client.

04 — INTERNAL COMPANY BRAIN

RAG ARCHITECTURE

Cited Answers from Your Docs

90% faster internal search. Query your SOPs, emails, and technical docs in plain language with direct source citations. No more "asking for files."

OUTCOMES

- Single source of truth
- Accelerated onboarding
- Zero search friction

05 — PERFORMANCE REPORTING

STRATEGY

Live Dashboards, Not Manual Exports

One KPI definition across ads, CRM, and ops. Live visualization with anomaly alerting. Eliminate the "reporting tax" on your analysts.

OUTCOME

Metric Alignment

Disputes resolved with a single, agreed KPI set. Real-time decisions from current numbers.

OUTCOME

Zero Manual Tax

Analyst time freed for optimization instead of data cleaning and spreadsheet merging.

06 — OPENCLAW HARDENING

SECURITY

Production-Ready Agent Stacks

Secure OpenClaw setup in your environment. Sandbox mode, permissions, and health monitoring. Policy before traffic to ensure stability and safety.

OUTCOME

Secure Adoption

Policy and sandbox before agents see real users. Documented recovery and provider fallback.

OUTCOME

Team Ownership

Runbooks and training so your team can run it. Your infra, your keys, your governance.

TEAM TRAINING

Ops Handover

WORKFLOW ARCHITECT. AI SPECIALIST.

BACKGROUND

7+ years building digital products. I design systems that fit your operations—not the other way around. I bridge the gap between complex AI and practical business needs.

SIMPLE TOOLS

I pick the simplest tech that solves the problem. No bloat.

HIGH ROI

Systems engineered to pay for themselves in weeks.

FULL OWNERSHIP

You own the keys, the code, and the data. Always.
